

DESIGN

Digital Printed Glass SSG® DuraScreen - DigitalPrint

Shiroko Clinic, Japan

Freedom in expression is boundless when it comes to digitally printed glass. SSG® DuraScreen-DigitalPrint allows photo images or highly detailed patterns to be printed on glass using special ceramic frit paints which are fused onto the glass surface during tempering or heat-strengthening process. It can be used for simple or complex interior and exterior designs. It also has extreme weather durability.

PRODUCT FEATURES

DESIGN VERSATILITY

With an extensive colour and effects palette, digital printing allows the conversion of a digital file into a glass product. It is highly-customisable and allows for the design to be made as tailored, and unique to the world. It is ideal for producing glass panels of consecutive designs.

USES AND APPLICATIONS

- Backdrops
- Logos
- Murals
- Photo Galleries
- Wall of Fame

Christchurch Botanic Gardens,
New Zealand

Changi Airport Terminal 1,
Singapore

Singapore Safety Glass, Singapore
