## Slip-Resistant Glass **SSG® SlipResistant**

The SSG® SlipResistant provides an ideal solution for slippery glass floors by incorporating a special slip-resistant coating to produce a hardwearing glass surface. It is available in colourless, silk-screen and a translucent colour with a wide range of patterns, allowing architects to get creative in their

designs for floors. The SSG® SlipResistant's coating also helps to protect privacy yet maintains a high level of light transmittance. Its applications vary from indoor to outdoor usage, such as glass floors, glass bridges, glass staircases, see-through catwalks, studios and lobbies.

### SPECIFICATIONS : Production Sizes

Minimum Size (W/mm x H/mm)	Maximum Size (W/mm x H/mm)
300 x 300	2,300 x 5,000

### PRODUCT FEATURES

#### ENHANCED SAFETY

SSG® SlipResistant exhibits good friction with footwear of different materials, thereby providing a safe and walkable surface that incorporates the beauty of glass.

#### DESIGN VERSATILITY

The slip-resistant material can be applied in various ways to create unique designs and finishes. In addition, SSG® SlipResistant can be laminated on digitally-printed glass panels (SSG® DuraScreen-DigitalPrint), which makes it possible for non-slip flooring to have virtually any design!

### USES AND APPLICATIONS

- Bridges
- Flooring
- Stairways
- Lobbies
- Runways
- Skywalks
