

# SSG® DuraClean

## Low Maintenance Glass

### Uses & Applications

- Canopy
- Curtains Walls
- Facades
- Skylights
- Windows
- Walkway shelters

SSG® DuraClean offers an innovative solution to reducing your maintenance cost. The facade will stay cleaner longer and allow easier cleaning when needed. The hydrophilic properties of the glass allows for water to spread evenly on the glass surface instead of forming numerous water droplets which could lead to an unsightly stain-like look when dried. The hydrophilic properties leads to much easier cleaning, eliminating the need for harsh or abrasive cleaning methods.

#### LOW MAINTENANCE

With lesser droplets formed on surface, this would reduce dry staining significantly which calls for low maintenance

#### ENVIRONMENTAL FRIENDLY

A reduced usage of cleaning agents with lesser number of cleaning cut down on water usage and chemical waste.

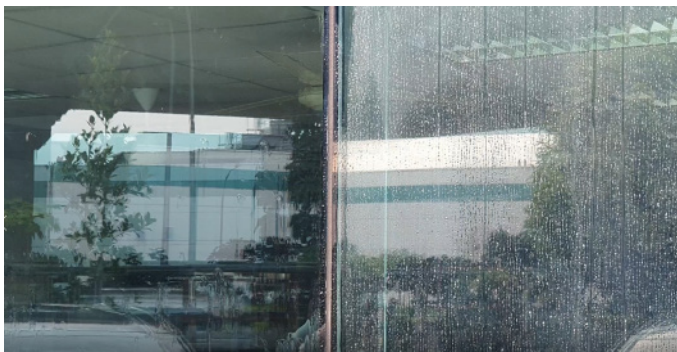

#### COST EFFECTIVE

With reduction of stains, this leads to less frequency and cost in cleaning efforts

### How it works

Water spreads evenly on surface instead of forming numerous water droplets

SSG® DuraClean®

Glass without any protection

### Production Size

Size (W/mm x H/mm)	Min	Max
Annealed	300 x 300	3,300 x 5,180
Tempered / Heat - Strengthened / Tempered Heat-Soaked		2,500 x 5,180
