# Easy Clean Glass SSG® DuraClean

SSG® DuraClean is an advanced glass coating solution developed to reduce maintenance requirements while keeping glass façades cleaner for longer periods. Designed for modern architectural applications, it helps maintain a clear and consistent appearance even in environments exposed to dust, pollution, and weather conditions.

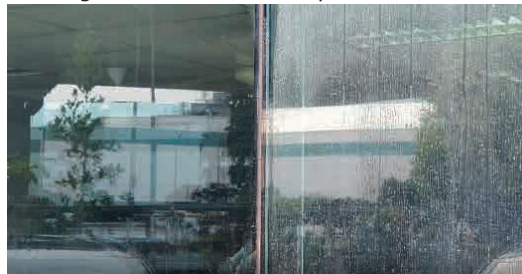

During rainfall, SSG® DuraClean encourages water to spread evenly across the surface instead of forming droplets. This sheet-like water flow helps wash away dirt more effectively, supporting a naturally cleaner surface. As a result, the need for frequent cleaning is reduced, and harsh or abrasive cleaning methods can be minimized.

## USES AND APPLICATIONS

- Canopy
- Facades
- Windows
- Curtain Wall
- Skylight
- Walkway Shelters

## How it works

Water spreads evenly on surface instead of forming numerous water droplets

SSG® DuraClean

Glass without any protection

## Production Size

Size (W/mm x H/mm)	Min	Max
Annealed	300 x 300	2,400 x 5,000
Tempered / Heat - Strengthened / Tempered Heat-Soaked		

## PRODUCT FEATURES

### Hydrophilic Surface Technology

Encourages water to spread evenly across the surface instead of forming droplets, allowing rainwater to wash away dirt more effectively.

### Reduced Chemical Usage

Minimises the need for harsh cleaning agents and abrasive cleaning methods, supporting more environmentally friendly maintenance practices.

### Low Maintenance Performance

Helps reduce cleaning frequency and long-term maintenance requirements, contributing to lower operational and cleaning costs.

### Long-Lasting Visual Clarity

Maintains a cleaner and more consistent glass appearance in exterior environments exposed to dust, pollution, and weather conditions.
