

SSG® Heated Marine Glass Panes for ship windows – Model GS

Installation and Operation Manual

1. GENERAL DESCRIPTION

SSG® Heated Marine Glass Panes for ship windows, Model GS, are high-performance electrically conductive glass that prevents condensation in all environmental conditions, while providing high visibility without the presence of visible heating elements.

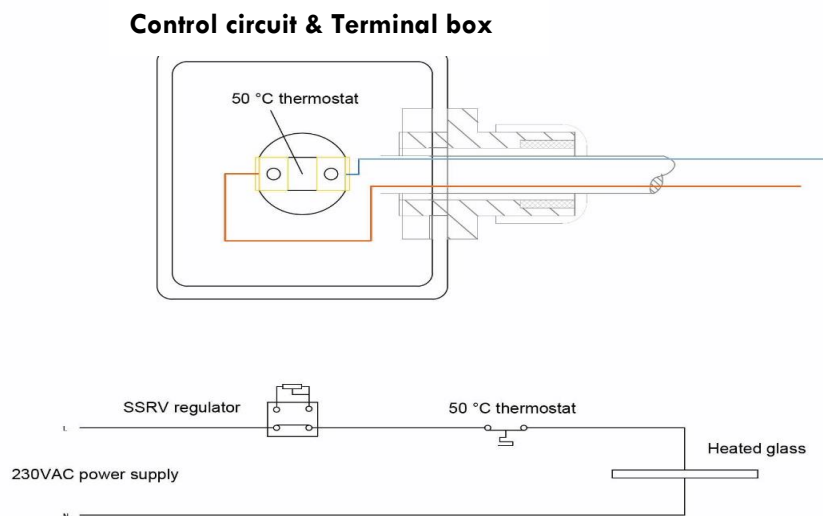

Operating Guidelines

1. The SSRV regulator and thermostat must be installed along with SSG® Heated Marine Glass Panes for ship windows.
2. Adjust the power regulator to regulate the glass surface temperature. The glass surface temperature should not exceed 45°C.

(Please consult the vendor for any assistance if necessary.)
